

Managing Dental Implant Cases from Digital Planning to Surgical and Prosthetic Procedure

Speakers: Dr. Ho King Lun, Dominic
Dr. Tse Yuen Kwan, Ingrid

Course content:

Dental Implantology has been developed and progressing into a central core of art and science in dentistry. To provide a true value of life to patients, we clinicians need to be skilful, knowledgeable and be passionate to perform excellence treatment.

This 2-day course aims at providing a comprehensive foundation of implantology skills by covering theoretical and practical elements. Course participants will have a chance to learn digital implant planning, surgical procedure to prosthetic procedure with hands-on sessions. In addition, oral health assessment for implant therapy and implant maintenance care are also important focus in this workshop. By bringing up-to-date knowledges and skills, this is an opportunity to learn and develop clinical skill needed to run a successful private dental practice with dental implant service.
